

KOKOROE

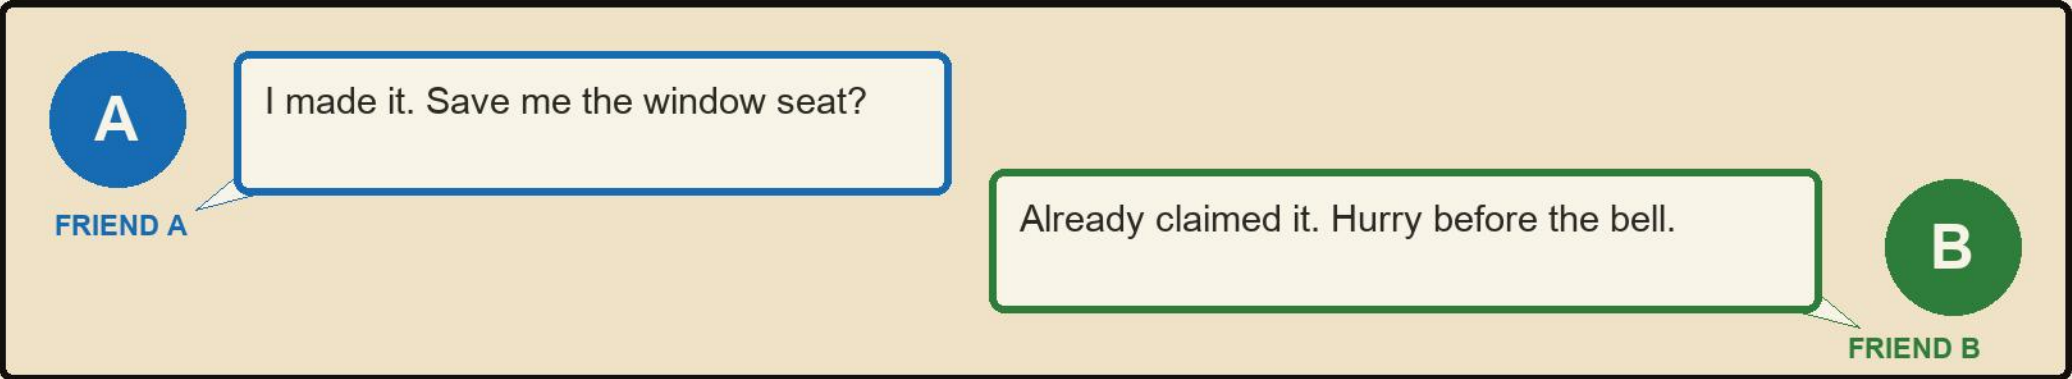

Messaging that grows into a shared visual world

Kokoroe is a manga- and comic-inspired communication platform. People still write to each other. The innovation is that conversation can carry more emotion, identity, and visual imagination as it unfolds.

START WITH PEOPLE TALKING TO EACH OTHER

The product is a communication space first. AI remains optional and supports the exchange.

OPTIONAL AI LAYERS ADD EXPRESSIVE RANGE

Different models can support the same conversation at different levels of complexity.

1

PRESENT THE FEELING

Lightweight models interpret tone and context so messages can appear with fitting comic-style expression.

2

MASK, WHEN ASKED

A user can ask AI to adapt wording to an avatar and world while preserving the intended meaning.

3

GROW THE WORLD

Longer multi-user context can guide relevant scene art and short comic-style animations as chat evolves.
